SNOW BLOCKADE.

Lower Lake Region Was Swept by a Blizzard.

THE STORM CONTINUES.

Cleveland, Buffalo and Other Trains Snow Bound.

Gale Piles Drifts on The Tracks.

Cleveland, N. Y., 15.—As a result of the heavy snow storm that raged throughout the lower lake region today, railroad traffic was badly delayed, on the lines running east from this city.

A high west wind caused the snow to drift in huge piles along tracks in many places.

The westbound Lake Shore limited arrived here nearly two hours late.

According to the local weather forecaster, the storm throughout the day and possibly tonight.

Choctaw's Ardmore Extension

Hartshorne, Nov. 14.—It is reported here that the Choctaw road has let the contract for building the line between here and Ardmore, and the work will begin at once.

There are 511 election precincts in Oklahoma and 217,000 territorial ballots were sent out. This on the estimate of 3 for each voter required by law indicates a vote of 72,000, an increase of 47 per cent over two years ago.

Big Money for Improvements.

The St. Louis & San Francisco railroad has awarded a contract for the expenditure of about 2½ millions of dollars in improving its roadbed and tracks from Kansas City south through Missouri, Oklahoma and the Indian territory into Texas.

By the terms of the contract, the contractors furnish their own

trains, men and equipment for the work of ballasting the track. From Sapulpa, Ok., the contractors will also have included in contract the work of grading a 200-mile extension further south into Texas. The ultimate object in view is to give the Frisco a mile-a-minute track from Kansas City south into Texas.

Did Mr. Bixby Say It?

The editor of the Christian Endeavor World says that the acting chairman of the Dawes commission gave out an interview to the Chicago Inter Ocean and quotes the following as coming from Mr. Bixby:

"The work of enrolling the Indians will be completed by the first of the year, and the work of appraising the land will be finished in one year from now, and the Indians will have been placed on their \$8,000,000 trust fund from the United States, and made citizens of the United States before the snow flies in the year 1901. Then the Indian Territory, with 20,000,000 acres of fine land, will be thrown into the hands of the whites, as all the Indians will either sell or rent their allotments, and it will be added as a state to the Union."

The great drainage canal built by Chicago at an outlay of about thirty million dollars and answers every purpose it was built for will be tendered to the government this winter on condition that it be made a ship canal by improvement make the Illinois and Mississippi navigable to the gulf to have an ocean going canal from the lakes to the world. It is estimated to cost fifteen million dollars to make the improvements.

An exchange says that a hypnotist up in Missouri put a woman to sleep and then buried her and left her in the grave six hours, and that when she was dug up she was none the worse for the ordeal. She had clerked for several years in a store that did not advertise.

The Hague, Nov. 14.—The Dutch cabinet has submitted to the states general a new bill proposing to drain the entire Leyder Zee.

A Big Gold Strike.

Cripple Creek, Col., Nov. 14.—A great vein of gold has been uncovered on the property of the property of the Gold Bond Consolidated Mining company on Gold hill (of which Charles H. Miller of this city is principal owner. The assay on a narrow streak of the ore body ran as high as \$102,000 a ton, while the vein from which this assay was taken, exclusive of the rich streak, has widened to a width of four feet and has given an average assay of \$200 to \$300 a ton.

Dennis T. Flynn Ill.

Guthrie, Nov. 14.—Delegate Dennis T. Flynn is seriously ill at the home of Major Randlett at Anadarko, where he went with his family last week. Mr. Flynn is on the verge of a collapse caused by the exposure and hardships of his campaign. He is suffering from partial deafness and a numbness of one side of his body is regarded as a threatened attack of paralysis.

In the Temple Bar Rev. Mr. Bacon says that the best preventives of disease are cleanliness and the access of sunlight and fresh air as being the agents most powerful in the suppression of bacteria. Large towns in Britain have each their true west end, for the western and southern winds being those that mostly prevail there, it follows that during a large portion of the year the smoke and fog drift away to the east and northeast, leaving the west clearer and purer. The writer claims British weather is at once the most capricious and at the same time the best adapted to vigorous and healthful enjoyment of life. The Briton is a stranger to the long ordeal of unvarying southern skies, the breath of pestilential air, and the stroke of sun or ague. The face and physique of the typical Britisher is the true weather mark of his climate.

Salmon Shot from Steamer Decks. Steamboat men coming up the strait report great sport shooting salmon with small rifles, with a number of which each vessel is provided. The fish were jumping so thick, says the Seattle Post-Intelligencer, that many were killed from the decks of the steamers.

Monogrammed Poodles. To possess a poodle with the owner's monogram neatly clipped in its curly hair is the latest thing necessary to complete the happiness of the London society woman.
